

INTERNATIONAL SEARCH REPORT

International application No.

PCT/JP99/01861

A. CLASSIFICATION OF SUBJECT MATTER
Int.Cl⁶ A61J3/10

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

Int.Cl⁶ A61J3/10, B30B11/00, 11/08, A61K9/00-9/72, 47/00-47/48

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Jitsuyo Shinan Koho	1922-1996	Toroku Jitsuyo Shinan Koho	1994-1999
Kokai Jitsuyo Shinan Koho	1971-1999	Jitsuyo Shinan Toroku Koho	1996-1999

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

☒ Further documents are listed in the continuation of Box C.☐ See patent family annex.

* Special categories of cited documents:

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family

Abstract (Basic): FR 1499681 A

Prod'n. of tablets from granular compns. contg. a low melting pt. material or adhesive comprises:-

- (a) introducing into a tableting matrix a first granular compn. contg. an abrasive (e.g. lactose, wood cellulose, Mg(OH)2, tricalcium phosphate, dicalcium phosphate and mixts. thereof);
- (b) compressing the first granular compn. into an abrasive tablet using a high compression force (23.62-39.37 kg/mm2, die penetration ca. 9.525 mm. or more);
- (c) ejecting the abrasive tablet from the tableting matrix;
- (d) introducing into the tableting matrix a second granular compn. contg. a low melting pt. material or adhesive;
- (e) compressing the second granular compn. into the final tablet using a low compression force (3.15-12.60 kg/mm2, die penetration ca. 3.175mm. or less;
- (f) ejecting the final tablet from the matrix; and
- (g) repeating operations (a) to (f) to produce the required number of tablets.

Tablets contg. one or more active materials of low melting pt. and/or adhesives are produced with satisfactory speeds of disintegration or dissolution and industrially acceptable appearance.

Title Terms: METHOD; PRODUCE; TABLET

Derwent Class: B07

International Patent Class (Additional): A61K-009/00

File Segment: CPI
